

4 Seasons Blinds

Conservatory Side Blinds

Finding a beautiful and practical solution to Conservatory windows has never been easier Technoshade will fit perfectly and compliment any style of décor wonderfully.

Installed inside the glazing bead the blind moves with the window or door allowing you to control the shading and ventilation precisely. The unique fixing of Technoshade makes it ideal for people with children or pets as there are no loose cords on display.

The honeycomb structure of the fabric gives the fabric a luxurious quality feel and has the added advantage of hiding all the cords creating a neat appearance with no unsightly holes.

Conservatories are always warm in summer and cold in winter Technoshade will act as a thermal blanket helping to keep your conservatory at just the right temperature all year round.

With a large choice of colours, patterns and blackout fabrics Technoshade offers the ideal solution for all conservatories.

Technoshade is also available with our unique chain mechanism to raise and lower the blind.

Call now for a free consultation with our design team on 01926 401123.

High quality blinds direct from the factory.
