

4 Seasons Blinds

Fly Screens

Insect screens are neat and unobtrusive, ideal solution for the home or commercial applications.

Insect screens are available with recessed fittings on the windows and doors. They

can be chain or spring operated with an option of handles for easy use.

Cassette and side channels come in white or brown.

Or for an alternate insect screen why not choose our string blinds on a vertical blind track. At patio doors the blinds can remain closed and be walked through without causing damage, this is good for pets and also acts as a deterrent to flying insects. There are 27 striking colours to choose from to complement your décor which will add style and elegance to any room.

String blinds are 89mm width with a 3000mm in length and are easily trimmed with scissors to the required length and will not fray.

4Seasons Blinds & Awnings Ltd 39 Millers Road Warwick CV34 5AE.
